Esnatech enables businesses to integrate **voice, mobility and presence** with the Cloud and Google® Apps.

Provide full unified communications with Google Apps by using esnatech’s award-winning, SIP-based application server **Office-LinX**

**Office-LinX™ Unified Communications for Google™ Apps.**

**esnatech Office-LinX** Unified Communications server is a SIP-based application that provides enterprise mobility, messaging and presence integration with Google™ Apps. Delivering enterprise voice and fax mail to your Gmail inbox as well as Speech and DTMF access to your Gmail account while on the phone. This SIP-based solution works with any phone system and supports any mobile device for full Unified Communications support within the Google Apps environment.

More features include, sharing phone status and presence with Google Talk, and integrating a full CTI Client (dialing and screen pops) as a web gadget with Google Gmail, Calendar and Sites. This solution provides seamless integration of Google Apps with Avaya, Nortel, Cisco, Alcatel and Broadsoft phone environments, as well as over 100 different small key systems such as Asterisk, Toshiba, Panasonic, NEC, Iwatsu, eOn and others. Office-LinX is offered in both Small Business as well as Enterprise Edition, supporting organizations from 25 users up to 30,000 users on a single platform.

**esnatech Office-LinX** UC for Google Apps fastens the Google Gmail hosted services to the enterprise telephony infrastructure. Users can link their office desk phone and mobile phone with their Google Applications. When a user receives an urgent email or voice mail, the UC gateway for Google will turn on their telephone message waiting light. Users can login to their Google Applications from any telephone, using speech to access, manage and respond to their email, voice mail and fax messages. Office workers leveraging thin clients can simply use a browser with any operating system and login to Gmail, to gain access to their voice messages, faxes and recorded conversations.
Esnatech enables businesses to integrate **voice, mobility and presence** with the Cloud and Google® Apps.

**OFFICE-LINX™**

**Key Features Enabled with UC for Google Apps:**

- Unified messaging for Gmail with any phone system
- FMC mobility integrated with Gmail, Calendar and Sites
- Fixed-to-mobile integration from Gmail with Apple iPhone, Android, BlackBerry, Symbian and Windows Mobile
- eFax services for Google Gmail and Google Docs
- Phone access to Google Contacts, Gmail and Calendar
- Email, voice mail, fax messages and recorded conversations all in your Gmail inbox
- Message light notification with your office phone system
- Enterprise, Presence and Availability integrated with Google Talk
- Find Me/Follow Me services integrated with Google Contacts and Calender
- Fax EDI integrated with Google Docs
- Google desktop searches integrated with live incoming phone calls
- Speech-enabled Google Directory or Active Directory for auto attendant and internal dialing
- Speech-enabled Google Contacts for sending voice messages and initiating live calls
- Click-to-dial from Google Apps, including your contacts and email signatures, etc.
- Full document storage and archiving (great value for archiving high-volume faxes and recorded conversations)

Leveraging Google Apps search technology, people can quickly search every email they have sent or received. Using keywords and advanced features combined with Office-LinX UC for Google Apps, users have full index searching capabilities for voice mail, fax messages, and recorded conversations directly from their inbox.
Esnatech enables businesses to integrate **voice, mobility and presence** with the Cloud and Google® Apps.

**Packaging**

esnatech Office-LinX for Google Apps is a software solution that is licensed on a per user basis. The minimum configuration is 25 users and can be scaled to support over 30,000 users in a single or multiple organization environment. Add-on modules that can be licensed are fax and speech services, as well as custom IVR scripts for business solutions, such as Salesforce and Microsoft CRM.
